Re: Reductions in Releases from Utah Lake Storage

Dear Brad:

The following diversion figures reflect the new maximum diversion rate for the canal companies on the Utah Lake/Jordan River Distribution System. The diversions have been adjusted to account for change applications which have transferred a portion of the water right of the respective companies. For the 1999 irrigation season, you are directed to reduce the diversion to each of the canals by the indicated amount or percentage if the full amount is not being diverted. The balance of the water is to be left in Utah Lake until you are directed to release the water.

Canal Company	Diversion Reduction cfs %		New Diversion Limit (cfs)
Utah Lake Distributing	12.0	9.0	123.0
Draper Irrigation	9.6	16.0	50.4
South Jordan	68.0	48.0	74.0
Utah & Salt Lake Canal	71.0	29.0	175.5
East Jordan	51.0	30.0	119.0
North Jordan	54.0	66.0	27.6

The Amwest Exploration Galena Canal right has been moved down the river for airport expansion mitigation lands during the past few years; however, it is our understanding that this change application will not occur this year. If Amwest still wishes to continue to move the water downstream, the change application is still valid, but they will have to contact you to move the water.

If questions should arise, please feel free to contact either Lee Sim, Jim Riley or me at the above telephone number.

Sincerely,

Robert L. Morgan, P.E.  
State Engineer
